🧩 SUMMARY

I'm Oakar Kyaw and a web developer with a passion for creating innovative and engaging web applications. My journey in web development began after I graduated with a degree in BE(Electronic) from Technological University Taunggyi. It was during this time that I discovered my interest in creating beautiful and functional websites that provide a great user experience. As a web developer, my project experience aligns perfectly with the requirements of the role. Skilled in utilizing React, Redux, and other related technologies to create dynamic and user-friendly interfaces. Developed a Job Portal application, showcasing expertise in front-end development, state management with Redux, and seamless API integration. Continuously staying updated with the latest trends and best practices in web development to ensure optimal performance and user experience.

🧠 SKILLS

Front-end

HTML, CSS, JavaScript,
Bootstrap, TailwindCss,
React, jQuery

Back-end

PHP, NodeJs, Laravel

Database

MongoDB, MySQL

Version Control System

Git, Github

🎓 EDUCATION

Taunggyi, Myanmar

Bachelor of Engineering in Electronic Engineering
Technological University, Taunggyi

PROJECTS

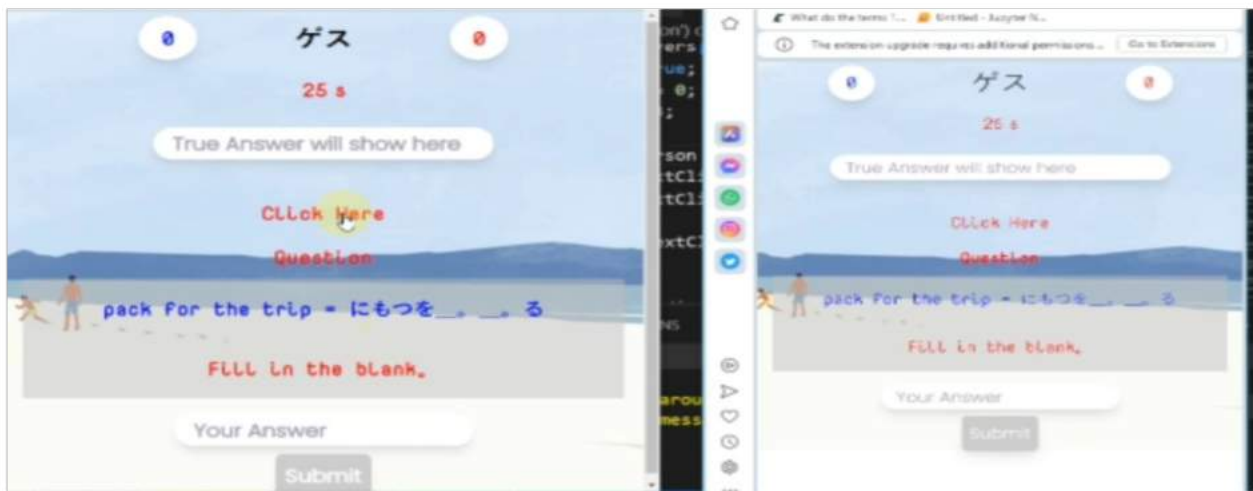

Website UI with TailwindCSS [↗](#)

Developed website UI using TailwindCSS, a popular utility-first CSS framework, to create a visually appealing and fully responsive UI.

- Utilized TailwindCSS's powerful features to create a seamless and intuitive system.
- Employed responsive design techniques to ensure the website adapts seamlessly to various screen sizes and devices, enhancing the user experience across desktops, laptops, tablets, and smartphones.

Multiplayer Japanese Word Guessing Game with React and Socket.io [↗](#)

Developed a multiplayer Japanese Word Guessing Game using React and Tailwind CSS, designed to help players improve their vocabulary and knowledge of the Japanese language.

- The game allows multiple players to connect and compete in real-time by guessing Japanese words based on given question.
- User-friendly interface with responsive design implemented using React and styled with Tailwind CSS, ensuring a seamless experience across devices.
- Real-time multiplayer functionality using Socket.io for seamless communication between players.
- Include difficulty level, time limit, and number of rounds.
- Comprehensive scoring system to track players' progress and determine the winner at the end of the round.

The Project is at - <https://japanesewordguessing.netlify.app> 

Job Portal with Redux and React

Developed a job portal application utilizing Redux and React. Users can search for job opportunities and apply for jobs. Companies can post job listings and manage their account. Administrators have full control over the site, including editing, posting, and deleting jobs.

- Created a user-friendly interface using React components and styled with Tailwind CSS.
- Implemented MongoDB for database storage and Express for server-side implementation
- Utilized Redux Thunk middleware to handle asynchronous actions and API requests.
- Integrated Axios for seamless API integration and data retrieval.
- Created a user-friendly interface using React components.
- Leveraged selectors to efficiently manage and display data from the Redux store.

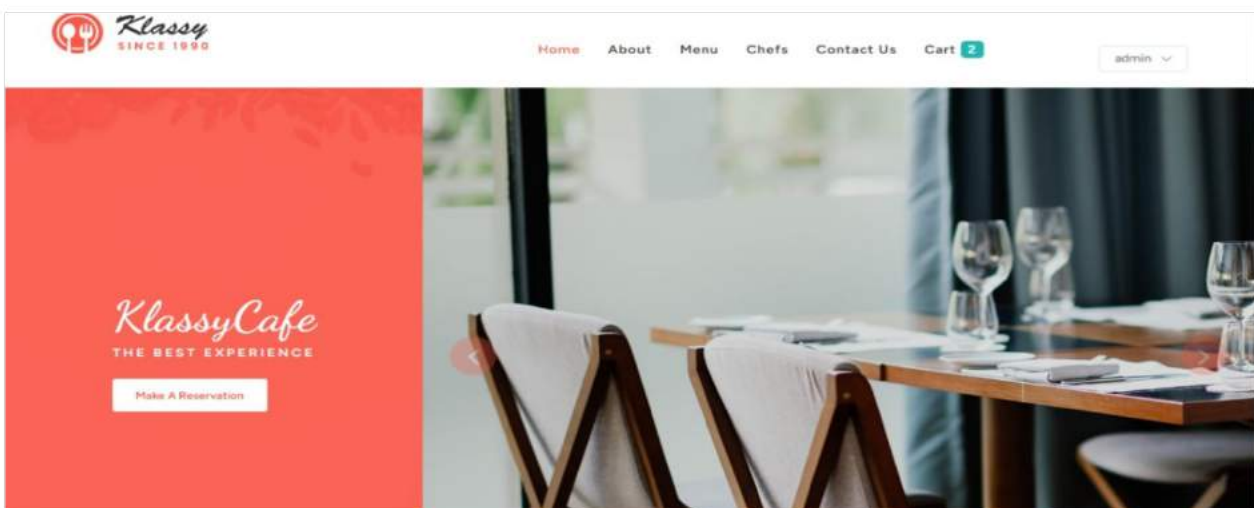

The project is at - <https://okkjobportal.netlify.app/> 

Administrator Account

account - *admin123@gmail.com*

password - *123456*

Mini Restaurant Reservation using Laravel

Designed and developed a mini restaurant reservations system using the Laravel framework.

- Implemented user registration and login functionality, allowing users to access various features such as adding items to the cart and placing food orders.
- Provided an admin account with the ability to manage CRUD (Create, Read, Update, Delete) operations for food items and reservations.
- Utilized MySQL database for storing users' information and content information related to food items and reservations.

The project is at - <https://github.com/Oakar-Kyaw/Restaurant-Reservation> 

COURSES

The Complete 2022 Web Development Bootcamp Course

Udemy

- Learned and applied the basic syntax of HTML, CSS, JavaScript, Bootstrap, jQuery, Node.js, and CRUD function of MongoDB.
- Learned and applied the basic syntax of React and developed a simple UI website with HTML, CSS, JavaScript, and Bootstrap.
- Developed a mini news website using HTML, CSS, Bootstrap, JavaScript, jQuery, Node.js, and MongoDB.
- Learned how to use Git (basic) and Github.

PHP with Laravel for Beginners - Become a Master in Laravel

Udemy

- MVC architecture, routes, views, controllers, migrations, and database management.
- Using Laravel's Eloquent ORM for CRUD operations.
- Dynamic views, data binding, conditional rendering, and reusable components. Routing and API Development: Custom routes, handling HTTP requests, building RESTful APIs, and authentication.

LANGUAGES

Burmese

English

Japanese

N3 (J-Test)

INTERESTS

- Learning new thing
- Reading
- Watching Movie

CERTIFICATES

- Certificate of Completion in Basic Networking System in MPT

ORGANIZATIONS

Taunggyi, Myanmar

Japanese Content Translator and Writer / Japanese Video Translator

Education

I am currently working as a Japanese video translator for educational purpose, along with my two friends
