### 🧩 SUMMARY

I'm Oakar Kyaw and a full stack developer with a passion for creating innovative and engaging web applications. My journey in web development began after I graduated with a degree in BE(Electronic) from Technological University Taunggyi. It was during this time that I discovered my interest in creating beautiful and functional websites that provide a great user experience. As a full stack developer, my project experience aligns perfectly with the requirements of the role. Skilled in utilizing React, Redux, and other related technologies to create dynamic and user-friendly interfaces. Developed a Job Portal application, showcasing expertise in front-end development, state management with Redux, and seamless API integration. Continuously staying updated with the latest trends and best practices in web development to ensure optimal performance and user experience.

### 🧠 SKILLS

#### Front-end

HTML, CSS, JavaScript,  
Bootstrap, TailwindCss,  
React, jQuery

#### Back-end

PHP, NodeJs, Laravel

#### Database

MongoDB, MySQL

#### Version Control System

Git, Github

### 🎓 EDUCATION

Taunggyi, Myanmar

**Bachelor of Engineering in Electronic Engineering**  
Technological University, Taunggyi

## PROFESSIONAL EXPERIENCE

present  
Yangon, Myanmar

### K-Win Technologies [🔗](#)

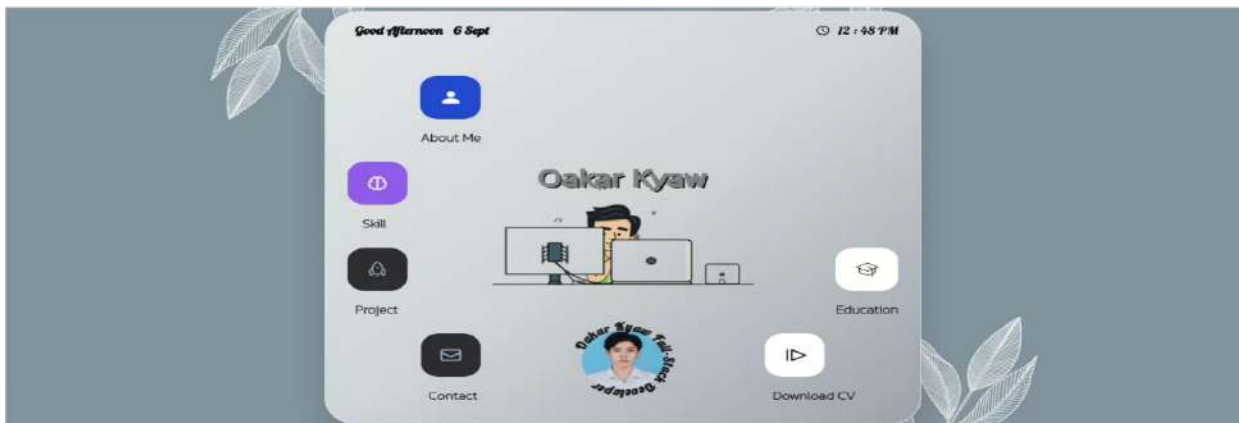

Full Stack Developer (Software Engineer)

- K-Win specializes in providing HRM software, point of sale software, and various website services.
- As a Full Stack Software Engineer at K-Win Technology, I'm responsible for managing the servers of Cherry K, Clinic Denovo, Human Resource Management Web App and Front-End of Wedding Project.
- I gains experience in server management, software development, and providing technical support for these products.

## PROJECTS

### Personal Web Portfolio with React [🔗](#)

Developed my portfolio website using React and incorporated TailwindCSS, a highly regarded utility-first CSS framework, to create a visually captivating and fully responsive UI. By harnessing the robust features of TailwindCSS, I crafted a seamless and intuitive system that elegantly showcases my skills, projects, and accomplishments. The implementation of responsive design techniques ensures that my website adapts effortlessly to diverse screen sizes and devices, delivering an enhanced user experience across desktops, laptops, tablets, and smartphones.

### Multiplayer Japanese Word Guessing Game with React and Socket.io [🔗](#)

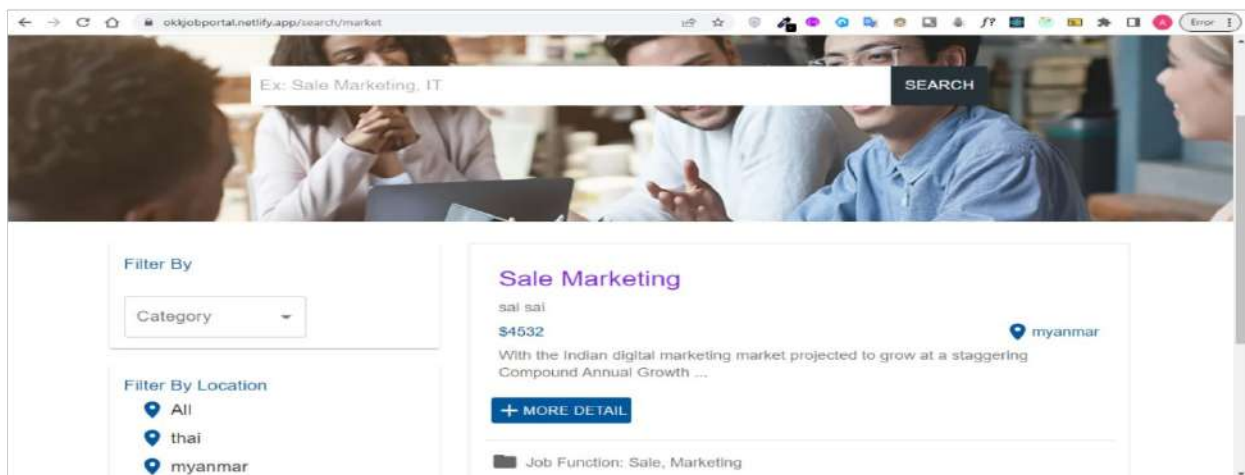

Developed a multiplayer Japanese Word Guessing Game using React and Tailwind CSS, designed to help players improve their vocabulary and knowledge of the Japanese language.

- The game allows multiple players to connect and compete in real-time by guessing Japanese words based on given question.
- User-friendly interface with responsive design implemented using React and styled with Tailwind CSS, ensuring a seamless experience across devices.
- Real-time multiplayer functionality using Socket.io for seamless communication between players.
- Include difficulty level, time limit, and number of rounds.
- Comprehensive scoring system to track players' progress and determine the winner at the end of the round.

## Job Portal with Redux and React

Developed a job portal application utilizing Redux and React. Users can search for job opportunities and apply for jobs. Companies can post job listings and manage their account. Administrators have full control over the site, including editing, posting, and deleting jobs.

- Created a user-friendly interface using React components and styled with Tailwind CSS.
- Implemented MongoDB for database storage and Express for server-side implementation
- Utilized Redux Thunk middleware to handle asynchronous actions and API requests.
- Integrated Axios for seamless API integration and data retrieval.
- Created a user-friendly interface using React components.
- Leveraged selectors to efficiently manage and display data from the Redux store.
